

### IN1010 Data Modeling Exercise 3 – entities (tables) & attributes

This exercise is a bit more conceptual.

**Movies** have an **ID**, a title and a **release date**. **Actors** have an **ID**, a **name**, and a **date of birth**. **Directors** have an **ID**, a **name** and a **date of birth**. Movies have **many** actors, actors can act in many movies, movies can have more than one director, and directors can direct many movies.

Develop data model in Visual Paradigm to represent the above scenario.
